## Master Your Strips. Improve Your Soil. Increase Your Yield.

The ZoneMaster, designed by strip-till farmers for strip-till farmers, is not just another strip freshener. It has been designed and created tough enough to create optimal spring strips or provide fall residue management. Vulcan Equipment's ZoneMaster uses vertical tillage and adjustable air-bag down pressure to create an optimal planting atmosphere. It is able to be pulled at speeds up to 13 miles per hour which allows coverage of many acres in a short amount of time.

**CALL US TODAY TO ORDER YOUR ZONEMASTER AND DON'T FORGET TO ASK ABOUT OUR AVAILABLE OPTIONS!**

- ZoneMaster has been field tested and proven for 10+ years to provide the best in quality and value to serve the purpose of creating a better yield via pre-planting preparation and soil condition optimization
- It clears residue, causing faster warm-up and dry-down. It causes quicker and more even germination
- It gives the ability to create spring strips or dress up fall strips
- It greatly reduces compaction as the planting rows are never driven on and a large tractor is unnecessary
- It can be used to apply starter fertilizer or liquid fertilizer in the root zone.
