FARM EQUIPMENT

# The Strip-Till Advantage

Backed by 20+ years of experience manufacturing products for strip-till, the 2984 Maverick™ HR Plus® facilitates precise nutrient placement and produces large savings in terms of time, water, equipment, and fuel costs.

## 2984 MAVERICK HR PLUS

**Adjustable design with options for fall or spring strip-till**

- » Spring-loaded disc sealers offer infinite adjustments for width, pitch, and distance from knife
- » 20" cutting coulter has 3 adjustable depth settings
- » Parallel linkage design with 5 depth settings for knife depth
- » Rock Trip Auto Reset feature eliminates need to leave tractor cab to reset knives
- » Vertical Tillage Adapter warms planting zone by gently stirring cool, wet soil
- » Rolling Basket breaks up large soil clods, leaving finer soils in the seedbed for optimal seed-to-soil contact

# Ideal for Reviving and Creating Strips

Field conditions are different every spring. The 2984 Strip Freshener warms the seedbed and creates a consistent planting zone, improving emergence of the crop.

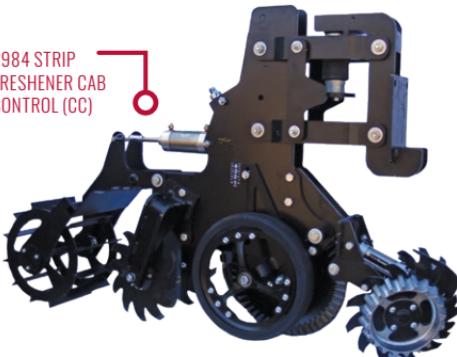

## 2984 STRIP FRESHENER

### Controlled tillage for the ideal seedbed

- » Features blade arrangement and rolling basket to make new strips or condition existing strips to warm planting zone
- » Operates at 6 to 10 mph and 1 1/2" to 4" deep
- » Features parallel linkage to follow field contour and to allow for easy adjustments
- » Optional liquid or dry fertilizer
- » Has universal mounting bracket to fit 4" x 4", 5" x 7", 6" x 6", and 7" x 7" toolbars
- » 2984 Strip Freshener Cab Control (CC) allows adjustments to be made from the tractor seat

# High-Speed Application With a Low-Disturbance Opener

Versatility, minimal soil disturbance, and speed—these are three reasons the 10,000 Magnum™ Opener for Fertilizer Application provides a return on investment and will help you save time when placing fertilizer.

## 10,000 MAGNUM OPENER FOR FERTILIZER APPLICATION

**Perfect for fall, pre-plant,  
and side-dress application**

- » Tube kit options for applying anhydrous, liquid, or dry fertilizer at high application speeds
- » Designed for fall, pre-plant, and side-dress application
- » Cuts through residue with minimal soil disturbance
- » Opener has a 22.6" blade set at a 4° angle
- » Spring-loaded knife has a carbide insert for extended wear
- » Optional floating row cleaner

# Knock Over Stalks as You Roll Through the Field

The road to profitability starts at harvest. Yetter's 5000 Stalk Devastator™ knocks over and crimps stalks so they contact the soil—accelerating the residue breakdown process and preventing expensive damage to tires and tracks during field passes.

## 5000 STALK DEVASTATOR™

Save tires and tracks from stalk damage

# Take Control From the Cab

Planting conditions change every hour, every day. With Yetter pneumatic, in-cab controlled 2940 Air Adjust™ equipment, that's no problem for your on-the-go operation.

## 2940 AIR ADJUST

### Row Cleaner

- » Features parallel linkage so row cleaner floats with ground contour
- » Available in wide and narrow widths
- » Adjust up and down pressures to create the ideal ride for row cleaners
- » Down pressure can be increased to fix row cleaner in rigid position

PATENTED

### In-Cab Controller

- » Change up or down air pressure in less than a second
- » Five presets can be programmed for quick changes
- » Utilizes an in-cab screen or integrates with existing ISOBUS monitor

# Put a New Spin on Closing Wheel Performance

How does the Twister protect your investment and maximize yield? By breaking up sidewall compaction and closing the seed trench. Yetter worked with our customers to develop the Twister for no-till, minimum tillage, and conventionally tilled fields.

## 6200 TWISTER POLY CLOSING WHEEL

**Crumbles and firms soil at the same time**

- » Twisted, rounded-center spike design breaks up the sidewall and closes the seed trench, setting the stage for more even emergence
- » Closes the disc opening in both wet and ideal conditions
- » Enhances seed-to-soil contact and helps prevent yield-robbing air pockets
- » Throws dirt back into the seed trench

# Real World Solutions

## FARMERS' FEEDBACK

### 2984 MAVERICK™ HR PLUS®

Brent Schmitz - Illinois

"Key to the Mavericks' success is their ability to seal in the nitrogen. The depth, angle, pitch, and distance from the row are all adjustable. In a challenging year, those benefits are very important. The fall was wet, and the soil varied from field to field, but our strips were always well sealed—other farmers and custom applicators were having trouble."

Paul Hamann - Minnesota

"The Maverick HR Plus is a very good tool, and strip-till is a real asset in dry years. Residue and placement of the fertilizer is extremely crucial. We deposit fertilizer in the berm below the root zone, which enhances the roots and provides stimulus for the roots to go down to find the fertilizer and moisture. I've been able to see the difference between strip-tilled and non-strip-tilled fields."

### 2984 STRIP FRESHENER

Lance Petersen - Minnesota

"With the Yetter Strip Freshener, spring strip-till is a lot less stressful. The ease of operation through our different soils, residue levels, and soil moisture is incredible. The seedbed we create is ideal to plant into and we are very pleased with the even crop emergence."

### 10,000 MAGNUM™ OPENER FOR FERTILIZER APPLICATION

Glade Mason - Illinois

"We decided on the Magnum because it allows us to get nitrogen to the plant during the growing season in a short window of time. Side-dressing 4,000 acres each year, we need a product that is durable and that has the ability to run at higher speeds with low disturbance. The Magnum is exactly that."
