Bringing you 20+ Years of Strip-Till Experience

More than two decades ago, Yetter Farm Equipment introduced products for strip-till.
Today, Yetter offers four models of equipment for different strip-till operations.

Coulter Strip-Till Unit for Existing or New Strips

The 2984 Strip Freshener is specifically designed to address the issues strip-tillers face, including field conditions, weather, and time. The three-blade design with rolling basket creates 10" wide strips in the spring or fall. The strips are warmer and drier, leading to a more consistent seedbed to plant into.

2984 STRIP FRESHENER

Controlled tillage for a 10" wide seedbed

- » Warms and dries soil to create optimal planting zone
- » Creates strips and refreshes existing strips
- » Operates at 6 to 10 mph and 1 1/2" to 4" deep
- » Places liquid or dry fertilizer in the strips
- » Parallel linkage and floating row cleaner follow field conditions
- » Universal mounting bracket to fit different toolbar sizes

Emergence with and without Strip Freshener

Strip Freshener ROI Checklist

- ✓ Multi-season solution: use in fall and/or spring
- ✓ Uses less horsepower, fuel, and time
- ✓ Covers acres quickly at 6 to 10 mph

2984 STRIP FRESHENER CC

Make adjustments with cab control for field conditions

- » Fine-tune air pressure of row cleaner, rolling basket, and row-unit down pressure from the cab
- » Adjustable depth control
- » Create new strips or freshen existing strips
- » Operate at 6 to 10 mph and at 1 1/2" to 4" deep
- » Optional dry or liquid tubes for fertilizer placement

CC MONITOR

ROLLING BASKET CONDITIONS STRIP FOR CONSISTENT SEEDBED

A Knife and Coulter Strip-Till Unit

The Maverick™ HR Plus® is used in the fall or spring to create strips 4" to 9" deep, with the option of placing liquid, dry, and anhydrous fertilizer. The adjustable disc sealers create consistent strips and close the knife opening. A mound of soil is left behind, leading to a drier and warmer seedbed to plant into than in between the rows.

2984 MAVERICK HR PLUS

Save time, water, equipment, and fuel cost

- » 20" notched cutting coulter features parallel linkage design and five settings for changing knife depth
- » Spring-loaded disc sealers offer infinite adjustments for width, pitch, and distance from knife to build the berm desired for your field conditions
- » Rock Trip Auto Reset feature eliminates need to leave tractor cab to reset knives or replace shear bolts
- » Available for application of dry fertilizer, liquid fertilizer, anhydrous, or any fertilizer combination
- » Adjustable row cleaners clear strips
- » Add the optional Rolling Basket to till and condition soil in one pass

HR PLUS

2984 VERTICAL TILLAGE ADAPTER

Bolts directly to Maverick shank in place of the knife

- » Warms the planting zone by gently stirring cool, wet soil
- » Features two coulters spaced 6" apart

2984 ROLLING BASKET

Improves soil condition

- » Breaks up large soil clods, leaving finer soils in the seedbed for optimal seed-to-soil contact

High-Speed Application With a Low-Disturbance Opener

Versatility, minimal soil disturbance, and speed—three reasons the 10,000 Magnum™ Opener is ideal for fall, pre-plant, and side-dress application of dry, liquid, and anhydrous fertilizer. With the Magnum, you'll cover acres quickly at operating speeds of 10 to 12 mph and with lower horsepower requirements than traditional knife units.

HIGH-SPEED APPLICATION

10,000 MAGNUM OPENER FOR FERTILIZER APPLICATION

Perfect for fall, pre-plant, and side-dress application

- » Offers tube kit options for applying anhydrous, liquid, or dry fertilizer
- » Mounting bracket available for optional row cleaner to create a combo unit that clears strips with minimal soil disturbance
- » Single-disc design cuts through residue with minimal soil disturbance
- » Opener has a 22.6" blade set at a 4° angle
- » Walking tandem wheel option firms soil as it rolls through the field behind the SharkTooth® Wheel and Magnum coulters

ATTACHMENTS & EQUIPMENT THAT DELIVER ROI

Residue Management

Closing Wheels

2967 SHORT FLOATING ROW CLEANER[†]
Wide and narrow models

[†]Precision Planting CleanSweep[®] compatible

2940 AIR ADJUST[™] ROW CLEANER
Several models available

Fertilizer Application

Real World Solutions Kale Carlisle - Illinois

2968 ROW-UNIT MOUNT IN-BETWEEN FERTILIZER OPENER
Single or dual application

2969 INTELLIJECT™ FERTILIZER OPENER

4000 NUTRIENT-PRO COULTER

2995 PARALLEL LINKAGE FERTILIZER COULTER

GENERATION III FERTILIZER COULTER

6200 N KEEPER™

“We wanted to switch to strip-till, but we were concerned about how well it would work on our 20” rows, especially for our corn-on-corn acres. The Yetter team helped us understand and create a complete strip-till system, starting with the combine corn head.

“We custom-built a strip-till toolbar using Yetter 2984 Strip Freshener CC row units—it saved us money and fit our operation.

“Our 325 horsepower tractor and 24-row strip-till bar have allowed us to drastically reduce our time, labor, and costs of putting in the crop, while achieving better fertilizer placement and making a better seedbed than we did with our previous system. The versatility of the 2984 Strip Freshener CC allows us to run whenever it works, and the in-cab adjustment allows us to keep rolling while maintaining high performance. The speed, performance, and versatility of the 2984 Strip Freshener CC has exceeded our expectations.”

To complete his strip-till system, Carlisle utilizes the Yetter 5000 Stalk Devastator™, planter attachments, and side-dress fertilizer coulters. Contact the Yetter team to learn more about how Carlisle uses these products, plus determine which Yetter products will fit your strip-till operation.

Innovative Products

We can't design real-world solutions from the office—our process has to start in your farms and fields. So each day, our team works with innovative farmers, dealers, and OEM partners like John Deere, AGCO, and Case IH. These relationships, combined with our extensive experience, help us engineer real, practical solutions for tough farming conditions.

Quality Manufacturing

To manufacture our innovative product lineup, we rely on state-of-the-art facilities and technology. From locations in Colchester and Macomb, Illinois, and Yazoo City, Mississippi, we meet the demand for even more efficiency and cost effectiveness with quality parts and products, outstanding customer service, and on-time delivery.

Knowledgeable Sales & Support

When we make product recommendations, our priority is return on investment for the customer. Our sales team—with a combined 200 years of experience—asks the right questions in order to fully understand each unique farming operation. Our world-class performance guarantee adds value to the Yetter product.

A Tradition Of Solutions Since 1930
